## DIGITAL T SHIRT PRINTING - any number of colours.

Large print on white		Large print on colour		Extras	
quantity	CMYK	quantity	CMYK + WHITE	Description	price
1	\$30	1	\$35	Artwork	\$70/hr
2	\$25	2	\$30	Rush jobs	
3	\$20	3	\$25	( same day)	+ 20%
4	\$20	4	\$25	Credit card	+ 2%
5 -9	\$17.5	5 -9	\$22.5	<b>Small pocket print</b>	
10 - 20	\$15	10 - 20	\$20	<b>less \$6 from large size</b>	
20+	\$13	20+	\$18		

- 1/ Maximum image size is 300 mm x 450 mm
- 2/ Prices are for 100% cotton garments. All other fabrics P.O.A. Shirt is **not** included
- 3/ You can expect a **5-10% fade** on all garments as the printed fibres wash away.
- 4/ Always check your artwork before sending it to us. **The image must be at final print size.**  
Low resolution ( 72 - 125 dpi ) images cannot be printed with any colour accuracy.  
Simply increasing the resolution of a low quality image in Photoshop will not improve the image.
- 5/ Hi resolution pdf files are the best way to email images. 200 dpi is sufficient.
- 6/ **For printing white ink.** Where the image is not on a separate layer, there will be an artwork fee to remove the background. Otherwise the printer doesn't know where to print the white ink.
- 7/ As this is a CMYK process, Pantone colour matching is not available. **Convert all RGB images to CMYK** to get an accurate preview.

The main advantage of this process is for small quantities with lots of colours in the image. Compared to screenprinting where there are a lot of setup costs , it will be more cost effective to print digitally up to 50 shirts ( depending on the no. of colours in the image and the type & size of image )

### VINYL TRANSFERS

Where the image is a one colour text or special finish ( glitter , reflective or metallic ) we will use transfer vinyls. These are completely fade resistant and compatible with all fabric types.

Price as per CMYK . Where complex shapes and large areas are involved, a surcharge may apply.
